#### Treatment (4Ts)

Terminate – rarely, we may be able to stop doing the activity altogether and thereby remove the risk altogether

Tolerate – accept the risk and live with it because it is within our risk appetite and the cost of mitigating action would outweigh the benefits

Transfer – move all or part of the risk to a third party or through insurance; however, sometimes accountability still remains, particularly with a Council, so caution is advised

Treat - take action to control the likelihood and/or impact and set a target to move the risk to within the risk appetite once the action has been implemented
